CAPABILITIES

Phelco Technologies, Inc., began in 1997, and has created a formula for success to help clients strategically integrate technology into an already existing business model. Innovation is the company's core competency and has led to more than 11 years of profitability. Currently, the firm is registered to do business in numerous states nationwide, and attracts (and implements) projects that require expertise such as:

- Business Impact Analysis
- System design & remote computing
- PC imaging & Data conversion
- Data management
- Data security
- Website architecture design & implementation
- IT Staff Augmentation / IT Project Management
- Logistical Project Management (DashBoard Management)
- Network infrastructure, design, implementation & management
- Disaster Recovery & Contingency Planning

LEADERSHIP

Phelco's CEO, Tasha Phelps, works to share the Phelco vision for appropriate utilization of technology. Not only does Ms. Phelps train educators on appropriate utilization of technology, but she is also a featured speaker at various technology conferences. As a monthly columnist for both Indianapolis – Area magazines, Ms. Phelps writes on issues related to the productivity and economic growth of the business community. Combined, Phelco's team experience amounts to over 60 years of handling strategic planning, networking and data security issues. As the industry continues to evolve, Ms. Phelps drives Phelco to explore innovative opportunities that, ultimately, enhance the global economy.
